- Speech_Recognition_Synthesis_20230807.02_p0.554630146.apk

General description

TeamChatBuddy is a POC software program designed to demonstrate the use of ChatGPT with Buddy.

Summary of installation procedure via ADB :

First installation of APKs TeamChatBuddy, Google, Speech_Regognition

Go to the directory where ADB is located

```
adb install -t TeamChatBuddy_x.x.xx.apk
```

```
adb install -t Google_14.33.12.28.arm64_Apkpure.apk
```

```
adb install -t Speech_Recognition_Synthesis_20230807.02_p0.554630146.apk
```

Modify authorizations in application settings in the Android Menu:

- ➔ Settings -> System/Languages & inputs/Advanced/Text-to-speech output/Preferred engine/Google
- ➔ Settings -> App & notifications -> See all XX apps -> Google -> Permissions -> Microphone -> Authorize

Updating the OpenAI API key in the TeamChatBuddy.properties file

For all modifications to the TeamChatBuddy.properties file

Here are the adb commands:

Copy robot file to PC

```
adb pull /sdcard/TeamChatBuddy/TeamChatBuddy.properties
```

Edit the file and change the API key line

Copy PC file to robot

```
adb push ./TeamChatBuddy.properties /sdcard/TeamChatBuddy
```

Attention

Once you've updated the new TeamChatBuddy.properties Prompt, you need to launch TeamChatBuddy and then the settings menu, manually delete the prompt, close the settings menu, close the App and then reopen it to view the modified Prompt.

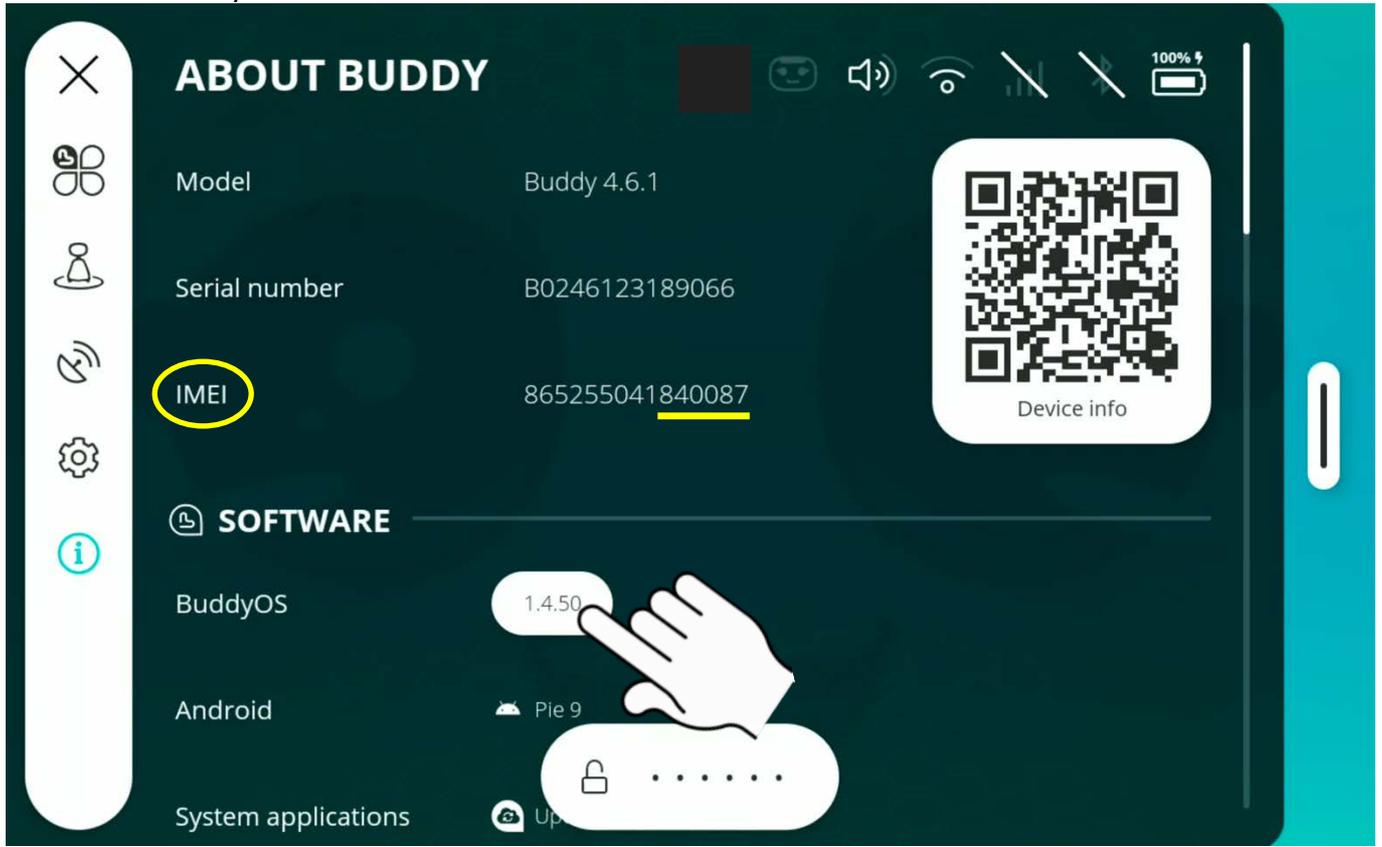

Uninstall/Reinstall TeamChatBuddy:

- Uninstall the APK and delete the directory /sdcard/TeamChatBuddy
- Reinstall TeamChatBuddy and launch the APP
You must edit TeamChatBuddy.properties, enter API key and restart the APP

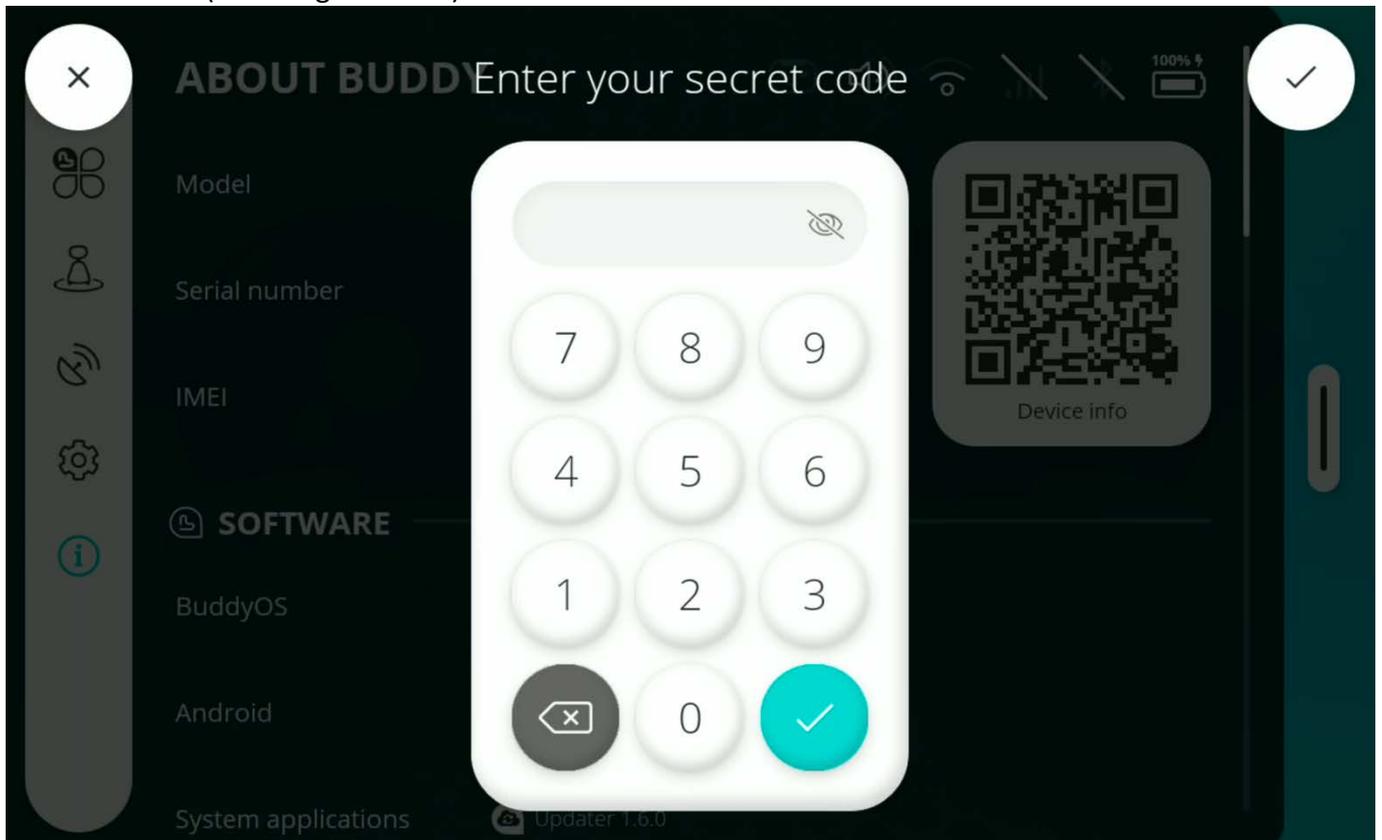

Installation via RDM TEST

Set the robot in Mode DEV

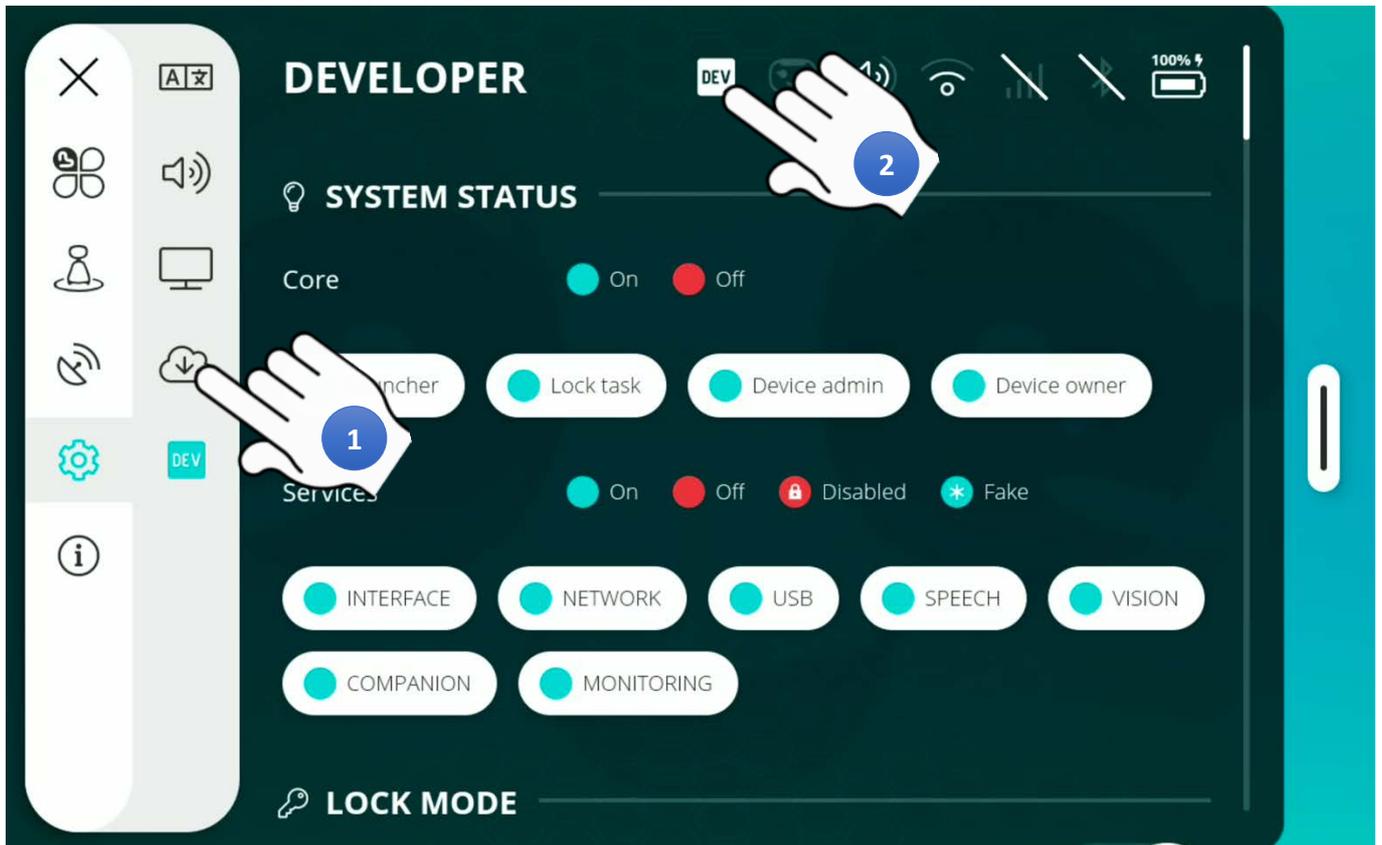

Tab 10x on 'BuddyOS'

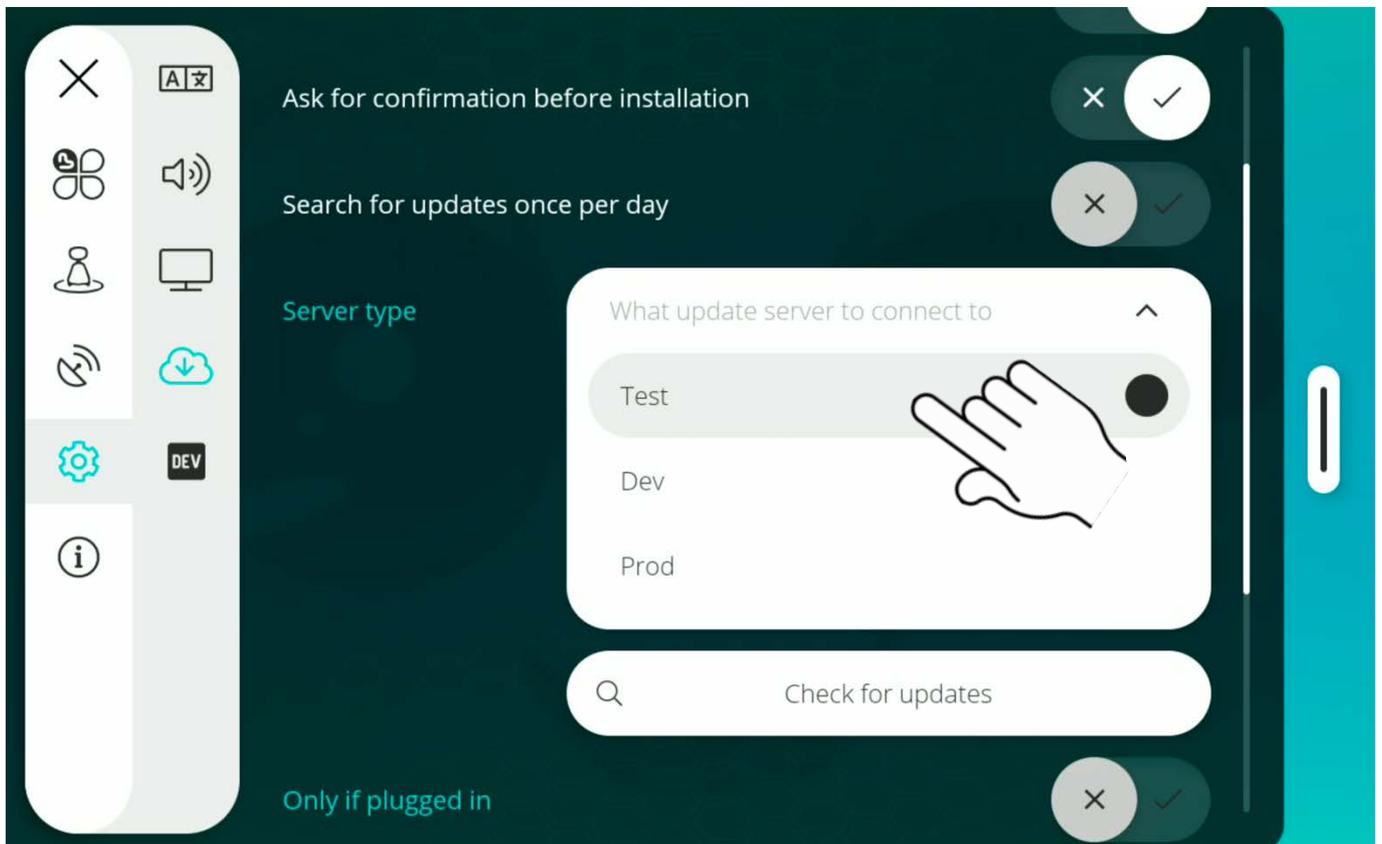

Enter the code (6 last digit of IMEI)

Goto Menu DEV and set 'Test' server

Select update server -> TEST
And **reboot the robot**

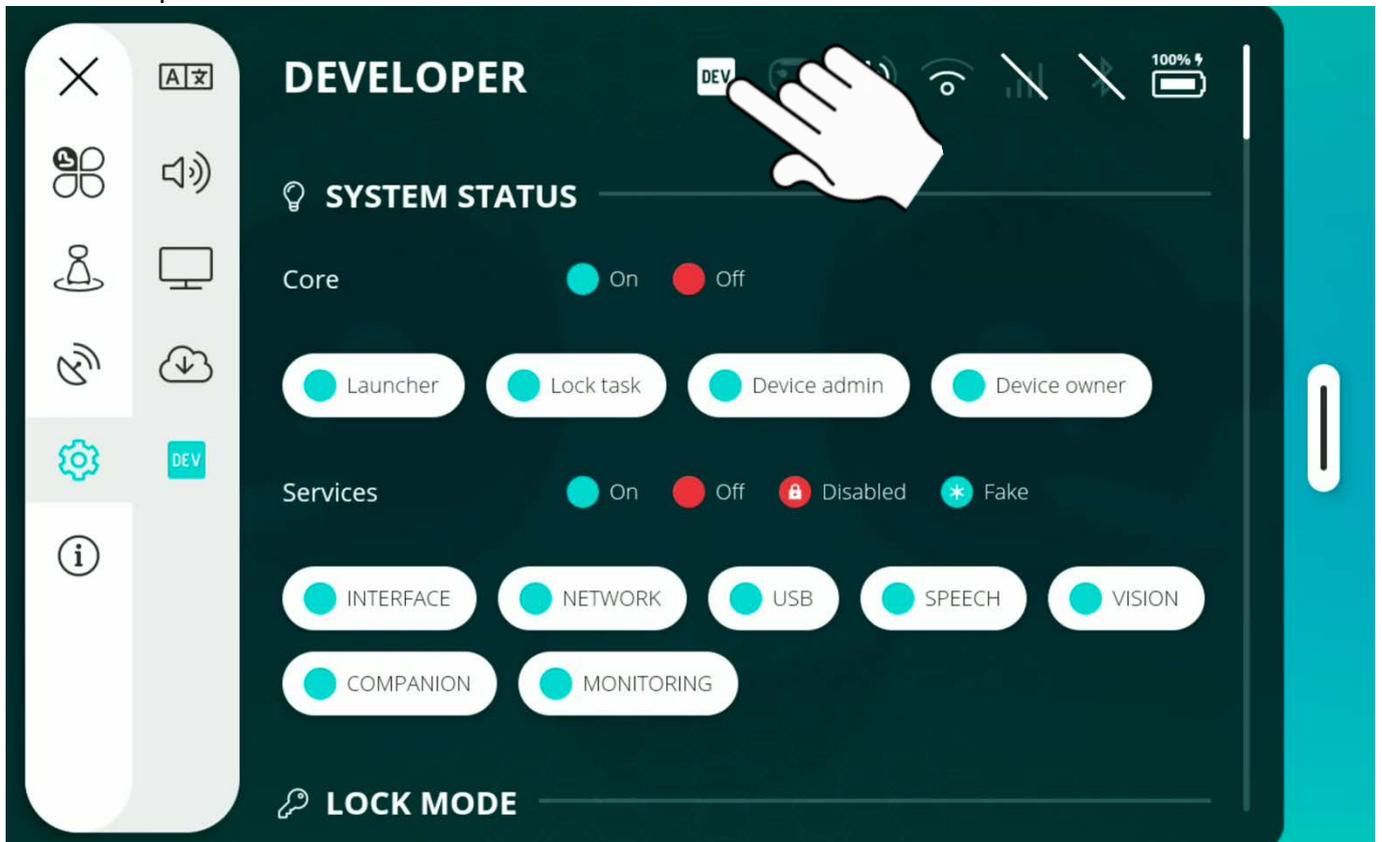

Accept Update

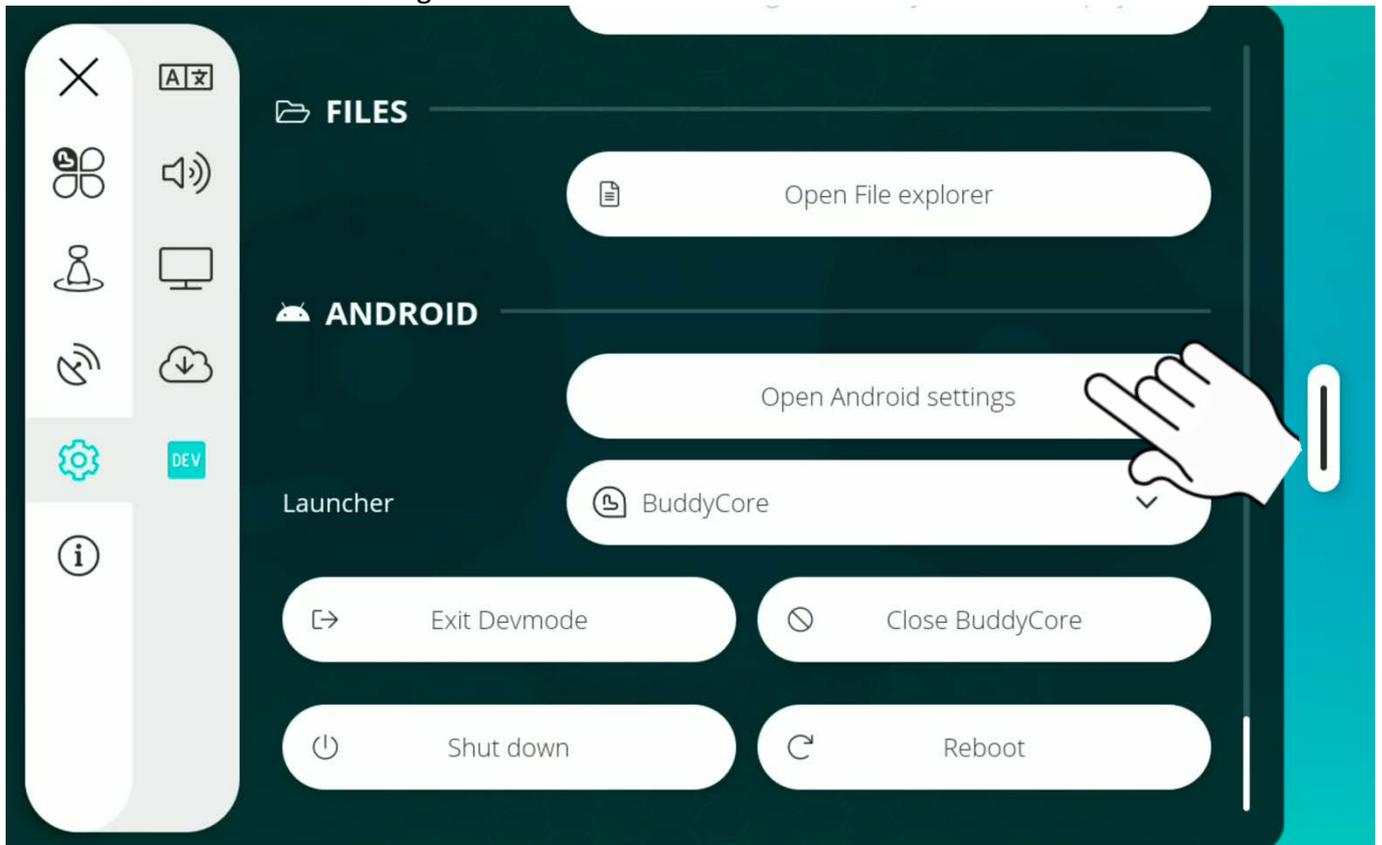

Goto Menu DEV

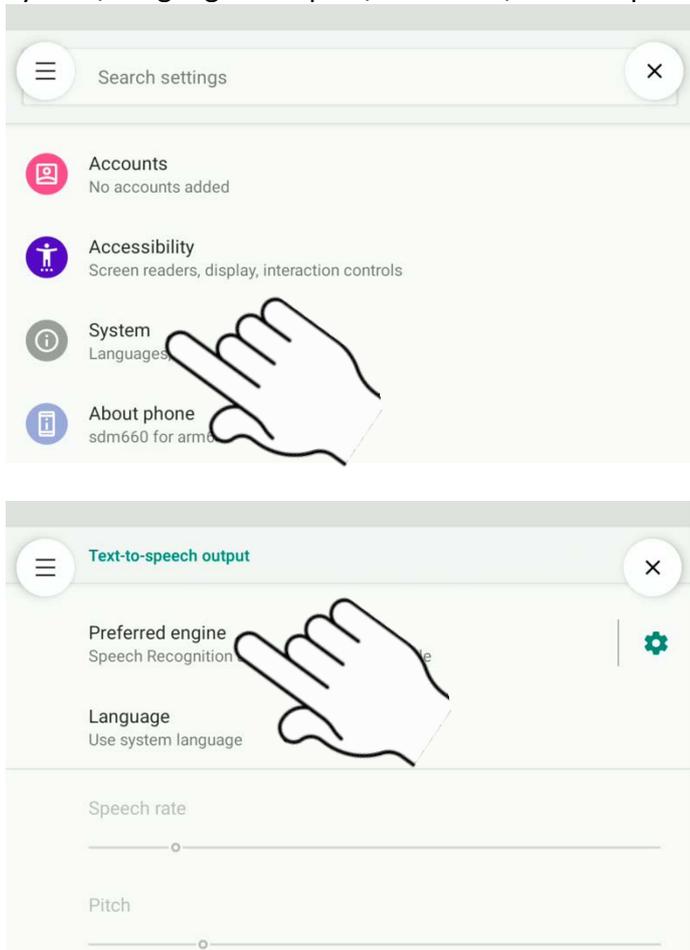

And scroll up to the end of the Menu

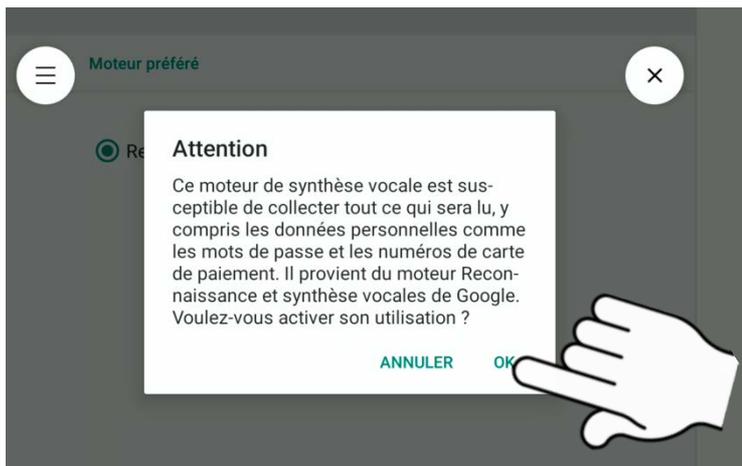

Launch access to Android settings

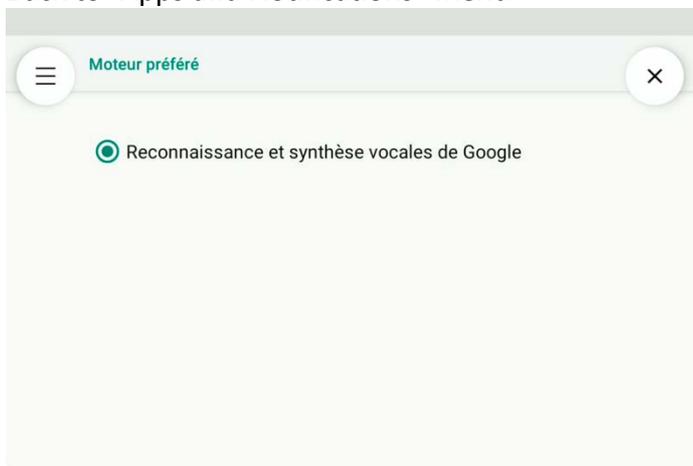

System/Languages & inputs/Advanced/Text-to-speech output/Preferred engine/Google

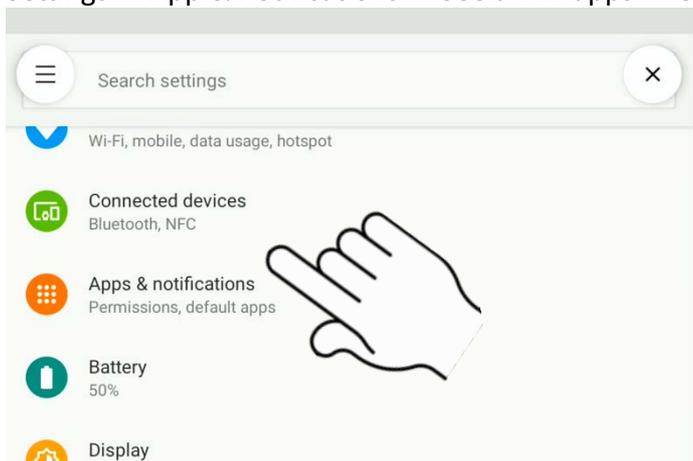

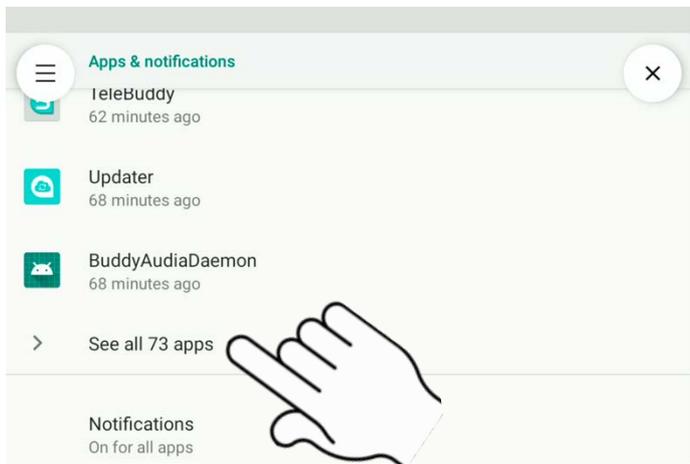

Back to "Apps and Notifications" menu

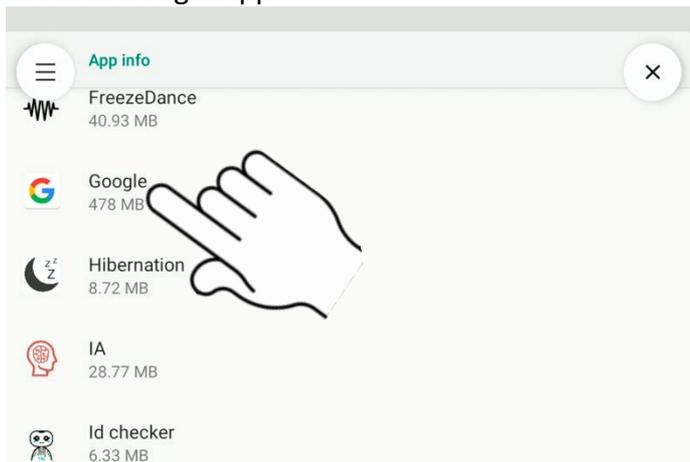

Goto « App & Notifications »

Settings -> App & notifications -> See all XX apps -> Google -> Permissions -> Microphone -> Authorize

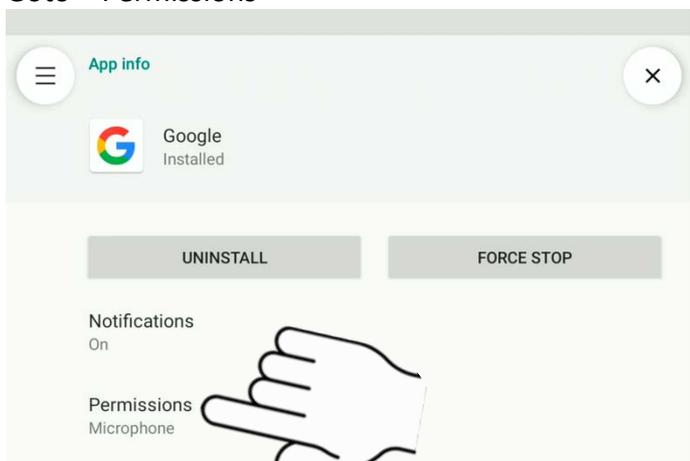

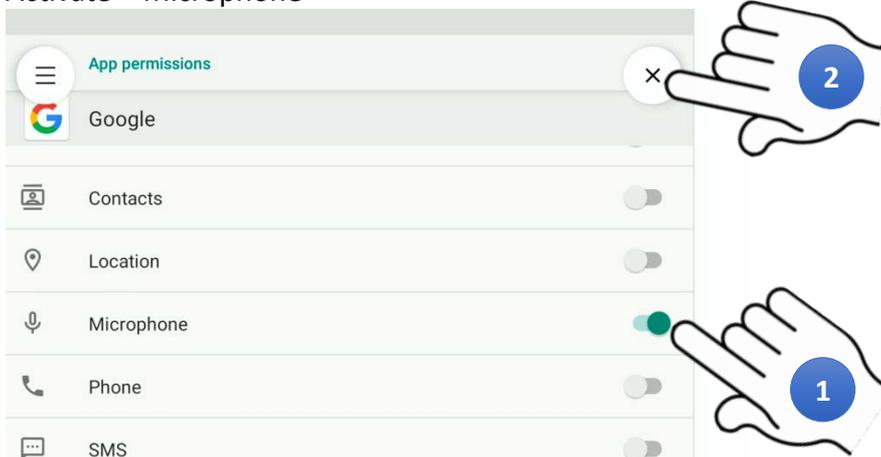

Look for Google App

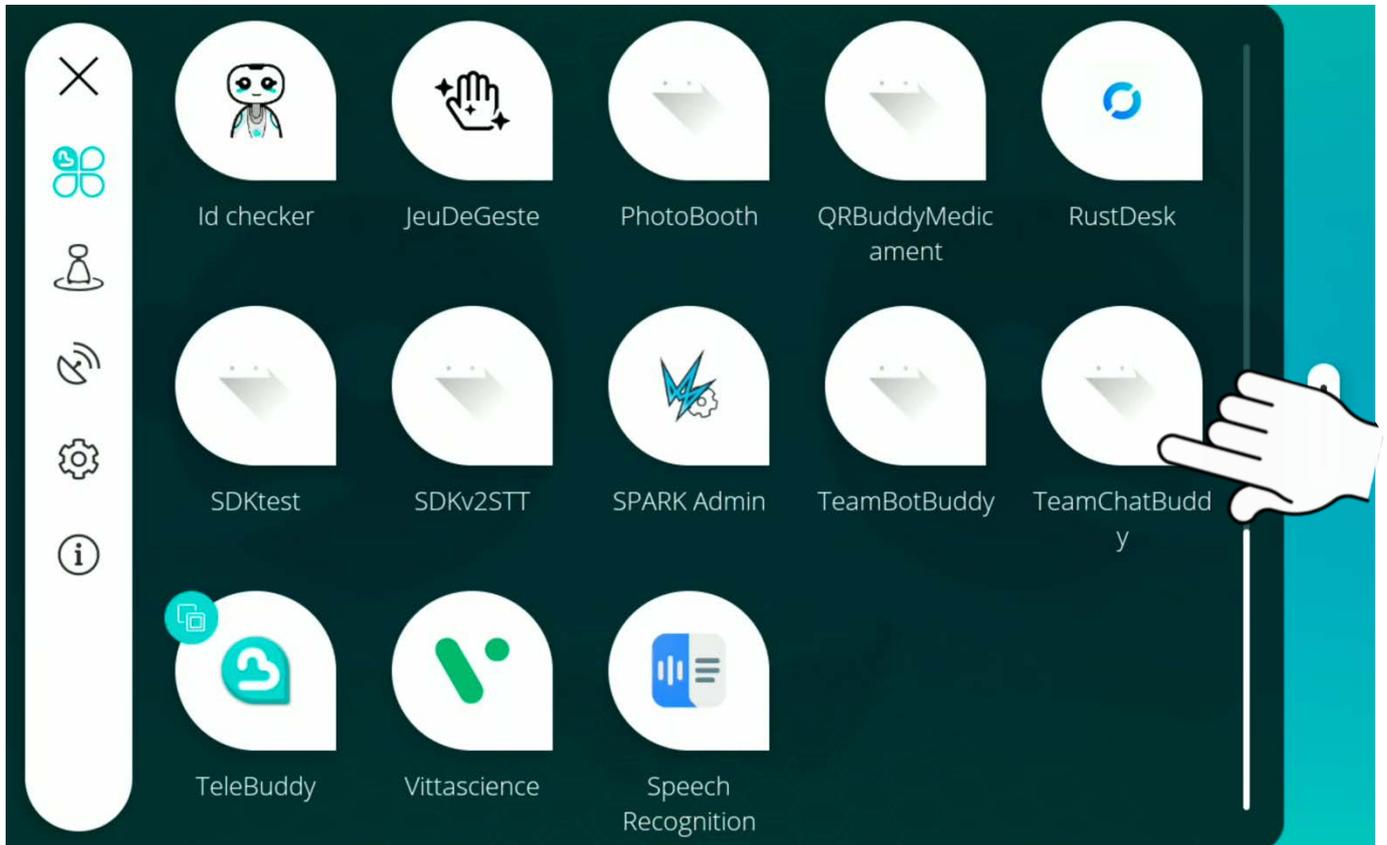

Goto « Permissions »

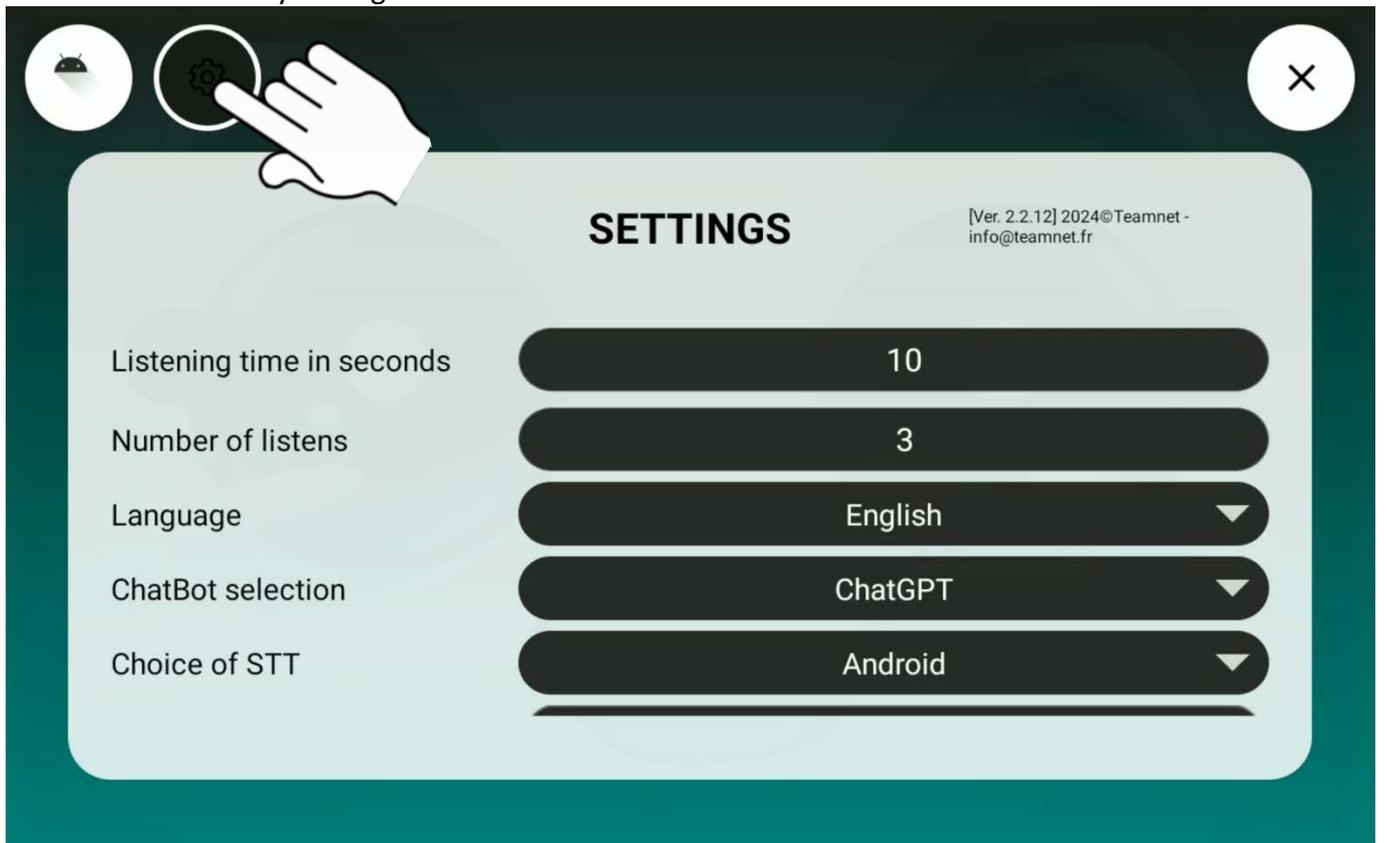

Activate « Microphone »

Launch the App « TeamChatBuddy »

Goto TeamChatBuddy settings

To understand TeamChatBuddy's settings, please consult the "TeamChatBuddy UserGuide" document.

Listening trigger

- Listening is triggered manually by “Ok Buddy” or by pressing onto the mouth.
- The robot turns its LEDs 'Yellow/Green' and displays blue waves on the face.
- Once listening is activated, you can start the conversation.
- Start with: “Ok Buddy”, “Hello, how are you?”

Installation of ADB.EXE

First install ADB.EXE under Windows10

Put the files :

“TeamChatBuddy-x.x.xxb.apk”, ‘TeamChatBuddy.properties’.

To connect to the robot from the computer where ADB.EXE is installed:

You must be connected to the same Robot/PC WiFi network.

Find the robot's IP address (192.168.X.XXX) in the Buddy/WIFI menu.

To communicate with the robot: adb connect 192.168.X.XXX
